

Sun Peaks Forecast (Inside ski area boundary)

Issued at 7 am

Morning

Afternoon

Evening

An arctic airmass is well entrenched over southern B.C. Weather systems will continue to give snow to coastal sections of southwestern B.C. Some of this moisture will interact with the cold air in the interior to give flurries or occasional snow at times. Accumulations look to be light. Winds light occasionally gusty for the afternoons. Daytime highs on the slopes will be near minus 15 C.

Current weather and snow conditions

Light southwesterly winds over night. Dress warm

Sun with cloud increasing

Dress warm (windchill -28)

Excellent groomed runs

Snow conditions

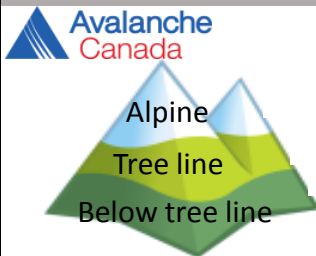

Tree line	HS	157	Snow T10 °C	-18.1	24 HR Trace
Below tree	HS	114	Snow T10 °C	-18.1	24 HR Trace

CAUTION

The avalanche hazard information is a generalized forecast from Avalanche Canada for this region provided for your information only. Local conditions can and do vary widely and can be dangerous at any time even if the forecast does not report this. Know your route, be properly equipped, notify someone of your travel plans, never ski alone. Sun Peaks Resort LLP does not endorse or encourage going beyond the ski area boundary at any time. Persons going beyond the ski area boundary do so at their own risk and assume all liability and responsibility for their own safety.
