SINGLE TRACK Community built and maintained trails may be rough and overgrown in spots—ride with caution and enjoy the single track!

DOUBLE TRACK Our Nordic trail network features wider routes with distinct double track, it's well signed at junctions and a great means of exploration.

WINTER NORDIC TRAIL (GREY) Not suitable for summer use; illustrated for navigation purposes only.

MOUNTAIN ROAD These sections often have a rougher surface due to recent and ongoing logging traffic—logging trucks may be present.

VALLEY NETWORK This low grade trail network utilizes both paved and unpaved sections and is shared by bikers and hikers.

FORESTRY SERVICE ROAD (BROWN) Relevant FSRs are shown for navigational purposes.
